Reference No. \$375CTY7I\$
CERCLIS No. CTD011184272

Dear Ms. Marsilio:

NUS Corporation is under contract to the U. S. Environmental Protection Agency (EPA) as a technical and management services contractor in support of the EPA's hazardous waste site assessment activities. In this support capacity, the NUS Field Investigation Team (NUS/FIT) has been assigned the task of conducting a Screening Site Inspection of the Bridgeport Name Plate Inc. facility, formerly located at 585 Fan Hill Road in Monroe, Connecticut. Information obtained from the Monroe Tax Assessor's office indicates that you are the current owners of this property. Any information that you could provide regarding activities at this property would be helpful.

A site visit has been tentatively scheduled for the week of April 23, 1990. Proposed field activities will include a reconnaissance of the property and the collection of environmental samples. Prior to these onsite activities, it is necessary for NUS/FIT to receive permission for site access from the owners of the property.

Your cooperation is requested in giving the EPA and their representatives access to complete this activity. Enclosed are two copies of our standard access form. Please sign both copies and return the original copy to me in the enclosed, self-addressed, stamped envelope; the other copy is for your records. During the site visit, NUS/FIT personnel may take photographs, collect samples, and dispose of small amounts of biodegradable detergent, methanol, and water, as detailed in the site access form. At your request, NUS/FIT will provide to you free of charge replicate samples in appropriate containers, in case you wish to have the samples analyzed at a laboratory of your choice at your expense.

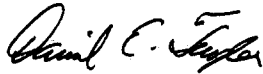

I will notify you well in advance of a finalized sampling date. Thank you for your cooperation and assistance. If you have any questions regarding either the access form or our activities, you may contact me at 617/275-2970, or Ms. Deborah Pernice, (617) 573-9698, the EPA State Coordinator for Connecticut, at:

Superfund Support Section (HSS-7)
US EPA Waste Management Division
JFK Federal Building
Boston, MA 02203-2211

If NUS/FIT collects onsite samples, a copy of the Final Screening Site Inspection report will be sent to you when it is complete.

Sincerely,

Daniel E. Taylor
Project Manager
